A 6,000 KW gas turbine was successfully test manufactured in 1965 at the Shanghai Steam Turbine Plant. This becomes a generating set when combined with generator and does not require a large boiler. Crude oil, filtered fuel oil or a natural gas can be used as a fuel in this gas turbine; therefore, it is suitable for mobile power plant or in oil producing area.

These ~~are~~ diesel engines manufactured by the Wu-hsi Diesel Engine Plant in Kiangsu Province are being readied for shipment. These engines have high horsepower and require low oil consumption. These can be used in farm drainage, irrigation, processing of farm products and for transportation. These are not only sold well in China but have<sup>also</sup>/received favorable comments in international fairs such as those held in Leipzig and Luzern [?]
